Projects

Football Schedule

Repo Live Version

*May take a few mins to load-free tier deploy

Full-stack sports scheduling platform for coaches and teams to create weekly or monthly schedules. Developed Automated ETL pipeline for data transformation using Excel file as a template and generating visual reports on player attendance.

- **Built With: Django Framework**
- **DB: PostgreSQL hosted on Neon**
- **Front-End: Bootstrap and custom CSS**
- **Excel import/export: OpenPyXL**
- **Reports generation: ETL pipeline**
- **Data cleaning: Pandas**
- **Visualization: Matplotlib**
- **Media files storage: Cloudinary**
- **User authentication, email login & password reset functionality**
- **Deployed on: Render**

BG-Football Trener

Repo Live Version

*May take a few mins to load-free tier deploy

My first Django project, developed as part of the final **exam/defense of courses** at SoftUni which I successfully completed with a **grade of 6.00.**
The app allows users to **share, organize, and discover** football drills. **Create and manage your coaching profile**, track your shared content, and interact with other users.

- Built With: **Django Framework (Python)**
- DB: **PostgreSQL hosted on Neon**
- Front-End: **Custom CSS**
- **Custom authentication backend** supporting email or username login
- An **asynchronous function** sends a greeting emails.
- **Deployed on Render**
